Information Letter on the Commodities Ordinance (BedGgstV)

Dear business partners,

On July 1, 2024, an updated version of the Commodities Control Act (BedGgstV) came into force.

Among other things, the amendment includes a new reporting requirement pursuant to Section 2a of the BedGgstV for companies that manufacture, handle, or market food contact materials as finished products.

This notification requirement applies in particular to products intended for end consumers, such as household goods, packaging, or kitchen utensils.

Our products—technical seals—are used as intended in machines, systems, and components that come into contact with food. They are therefore considered food contact materials within the meaning of Section 2 (6) of the German Food Code (LFGB) and are subject to the corresponding requirements for materials and objects that come into contact with food.

After reviewing the legal requirements and consulting with the relevant authorities, we can confirm that Möller Industrietechnik GmbH and Möller Metaldichtungen GmbH are not subject to the reporting obligation under Section 2a of the BedGgstV, as we do not manufacture or market finished products for end consumers.

Regardless of the reporting obligation, we evaluate our products with regard to the relevant requirements for materials and articles that come into contact with food. Compliance with specific legal requirements (e.g., Regulation (EC) No. 1935/2004, US FDA, LFGB, BedGgstV, BfR recommendations) is product-specific and is only confirmed by us where the respective requirements are met and corresponding evidence is available.

This information letter represents our verified and standardized information on the scope of application of the Commodities Code.

Kind regards,
Your Möller team

Möller-Industrietechnik GmbH
Möller-Metaldichtungen GmbH
